

# The right to be you

Identity is a fundamental right  
– IN Groupe helps defend it.

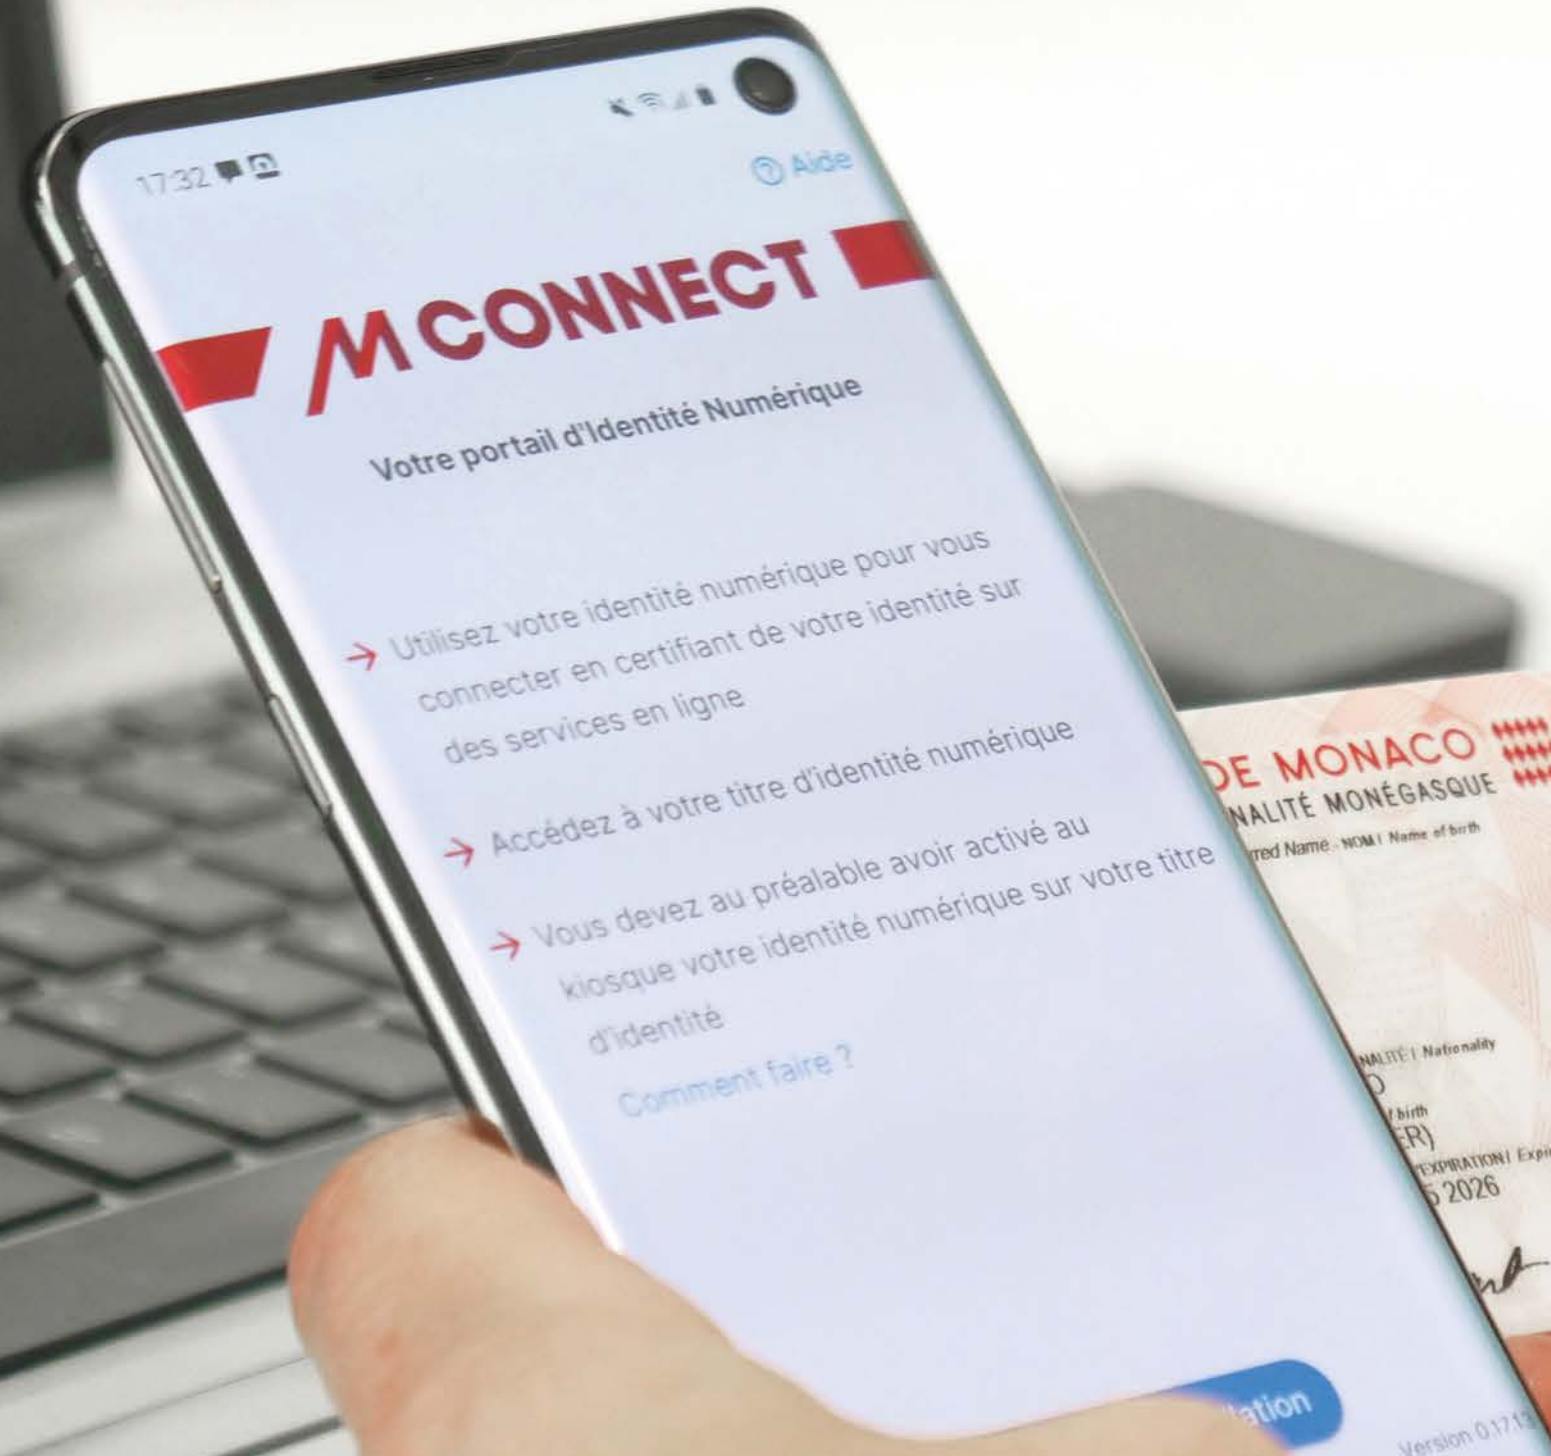

An aerial photograph of Monaco, showing a dense urban landscape with numerous multi-story buildings. The city is built into a valley, with a large mountain in the background. The harbor is visible in the foreground, filled with many boats and yachts. The sky is blue with some clouds.

## How the Principality of Monaco uses **IN Groupe to deploy a digital identity system**

As part of the Principality's digital transformation program – Extended Monaco – the Princely Government, through the Interministerial Delegation overseeing the digital transition, has launched a number of major projects (Sovereign Cloud, 5G, Digital College, e-Health, Security Token Offering, etc.). IN Groupe was tasked with defining, developing, implementing and deploying a comprehensive, integrated ID system (physical and digital).

The digital ID in Monaco, built into the new electronic ID card which can be used on a smartphone or PC, is based on highly secure technology solutions. Designed to straddle the physical and digital worlds, the Monaco digital ID enables high level authentication with qualified signatures.

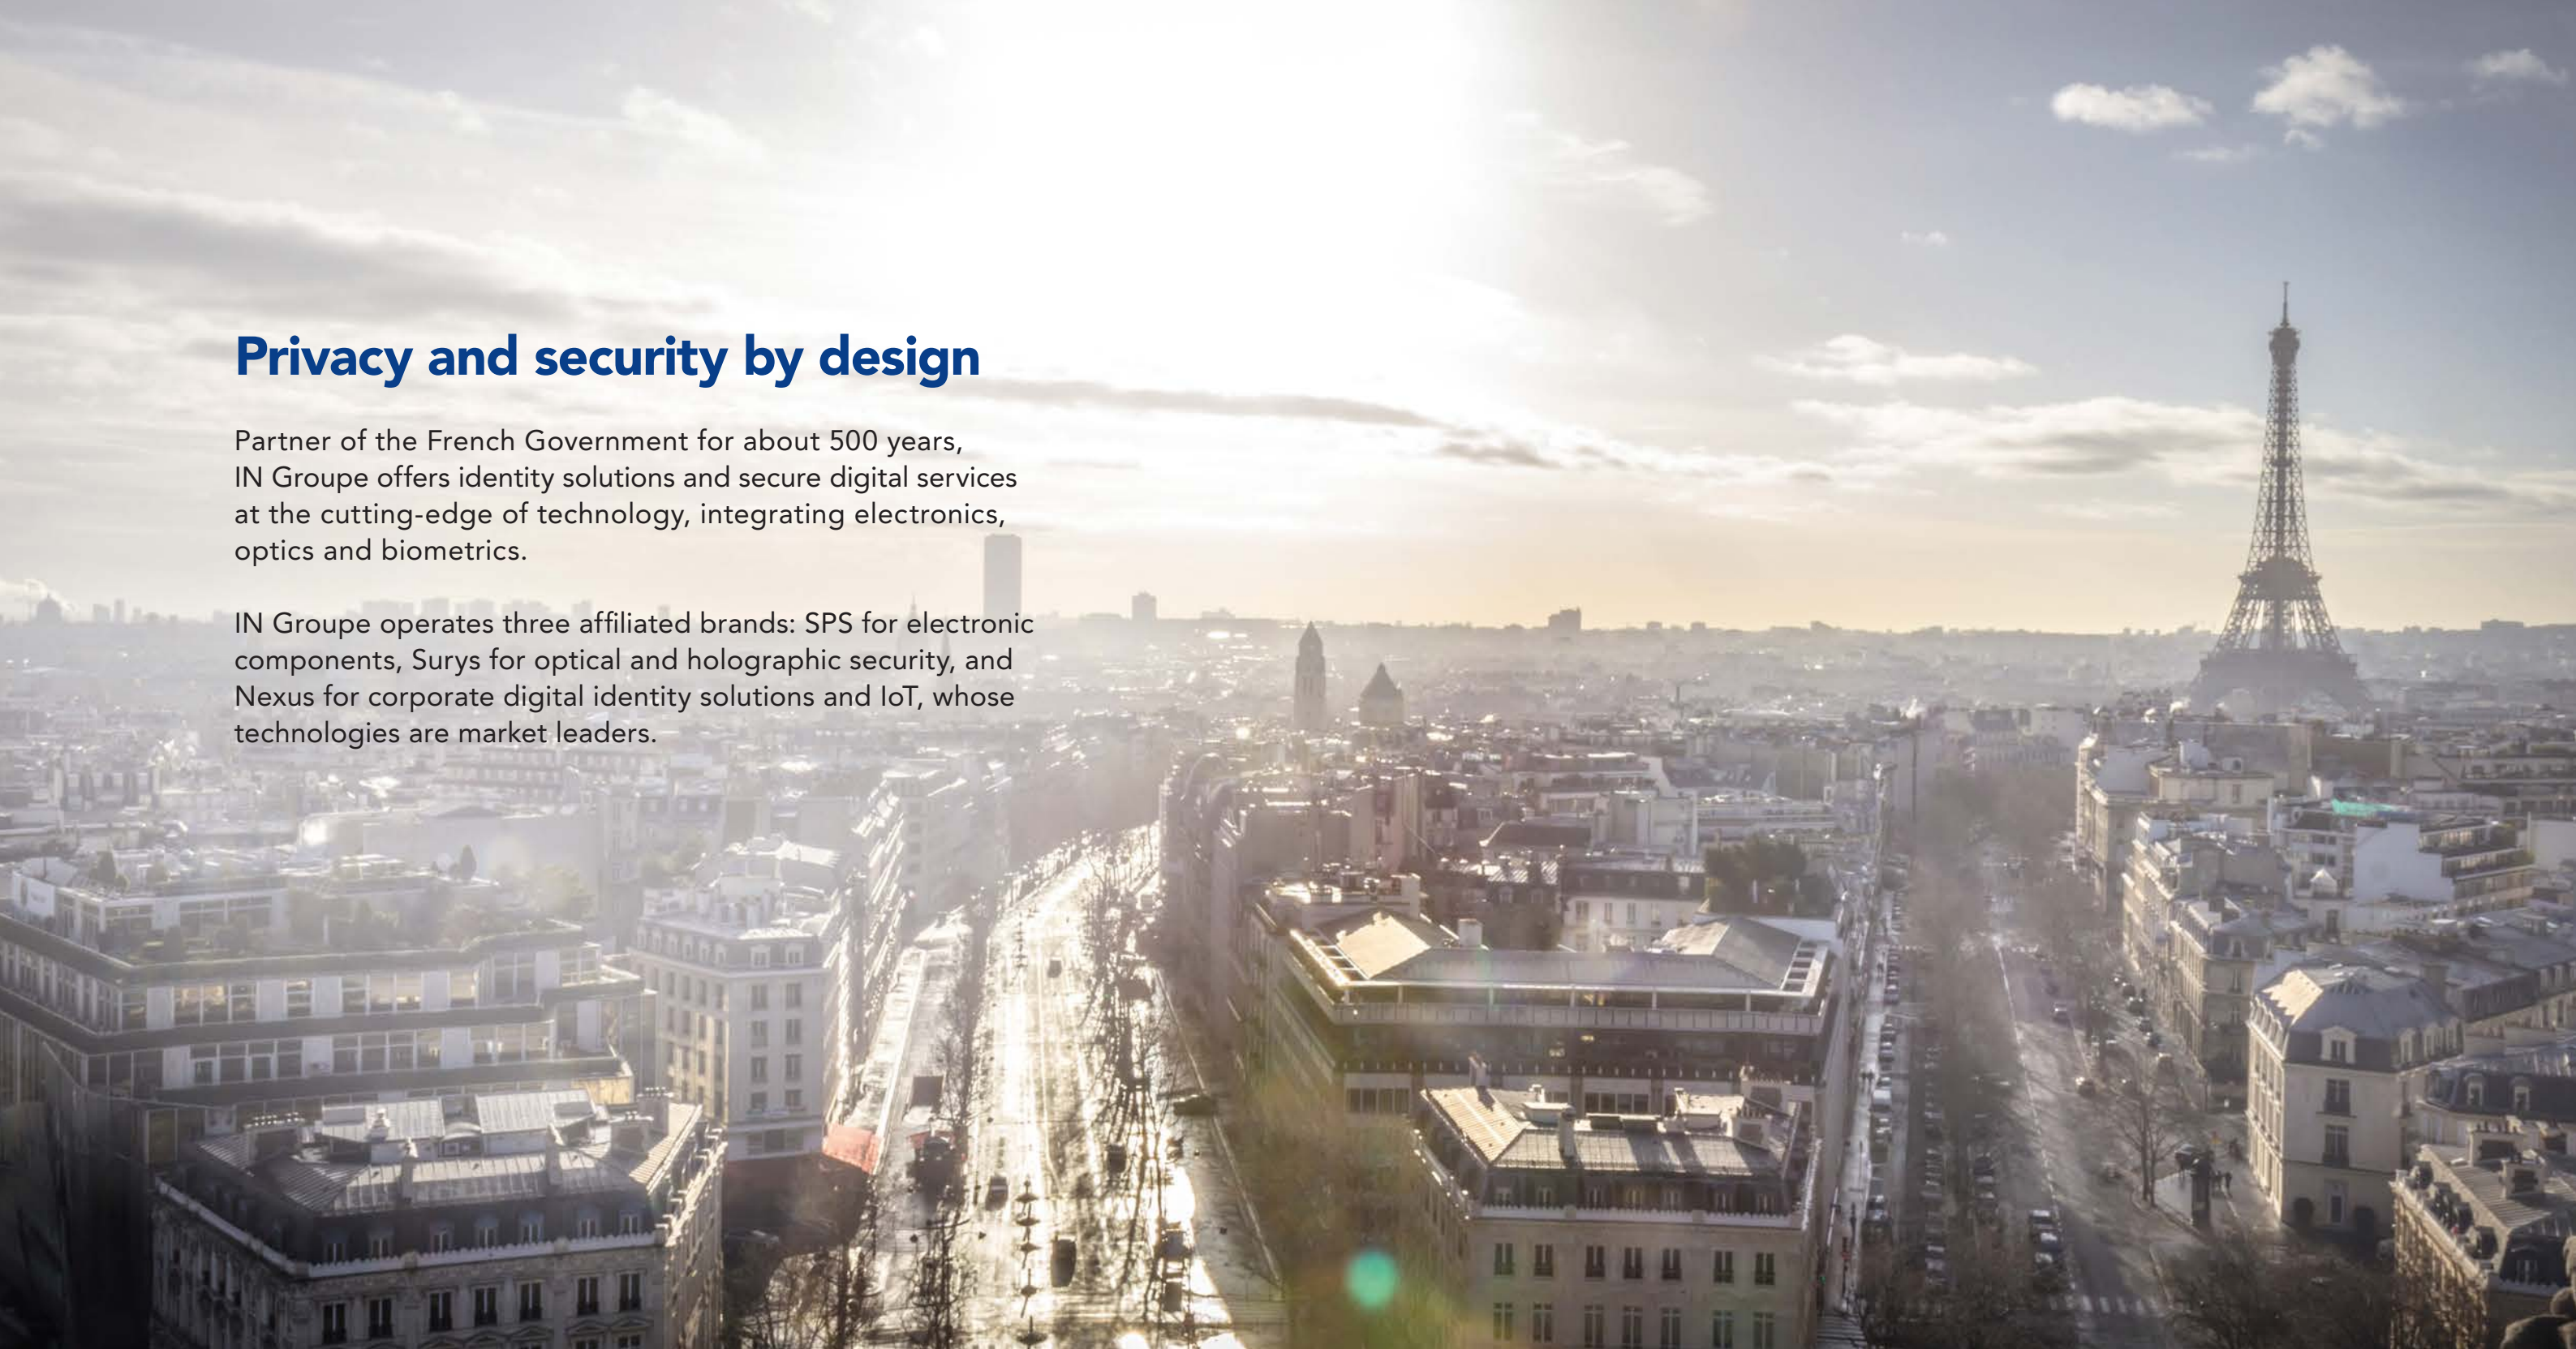

## Turnkey digital platform

With the creation of a turnkey digital platform, MConnect, IN Groupe is responding to a number of major challenges. These include allowing online transactions while keeping information secure, making online processes easier while guaranteeing data protection and facilitating the integration of digital tools in everyone's daily life while combating fraud.

One of the key success factors in setting up the Monaco program was based on the design and quality of the system components, but also on the robustness of the solution deployment plan and the maintenance strategy throughout the life of the system's operation.

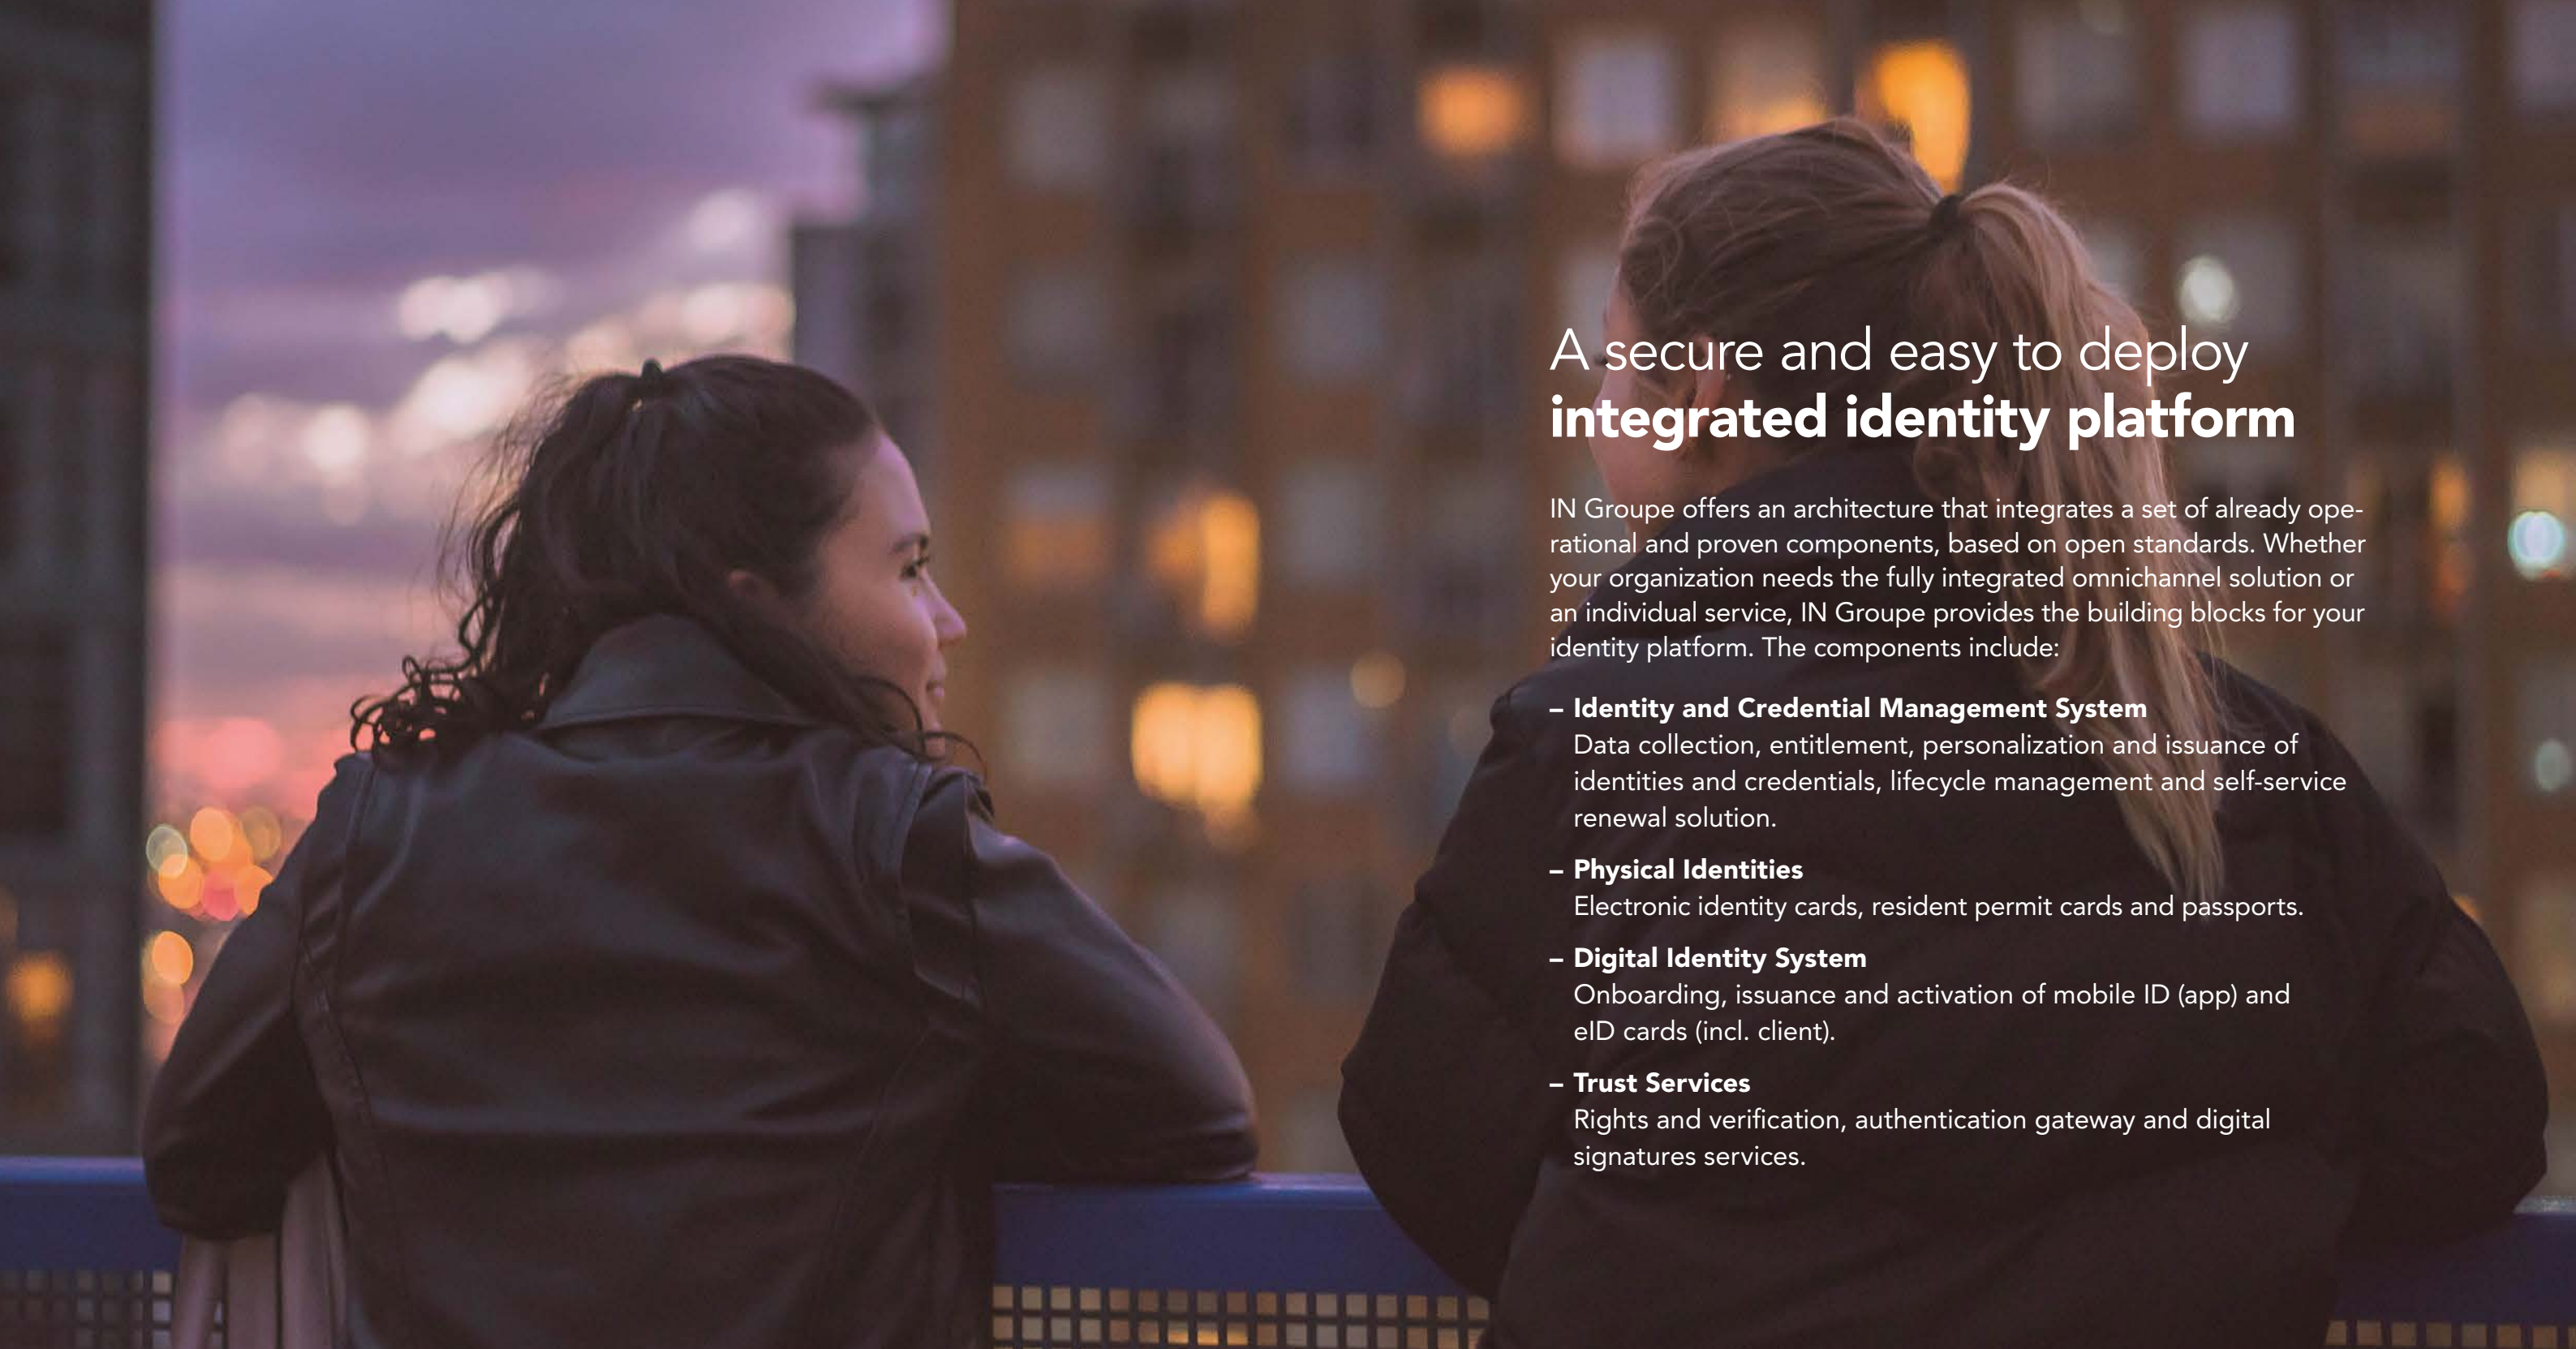

An aerial photograph of Paris, France, taken from a high vantage point. The sun is low on the horizon, creating a warm, golden glow over the city. The Eiffel Tower is visible on the right side of the frame, rising above the dense urban landscape. The foreground shows a wide, tree-lined boulevard with buildings on either side. The sky is filled with soft, wispy clouds.

## Privacy and security by design

Partner of the French Government for about 500 years, IN Groupe offers identity solutions and secure digital services at the cutting-edge of technology, integrating electronics, optics and biometrics.

IN Groupe operates three affiliated brands: SPS for electronic components, Surys for optical and holographic security, and Nexus for corporate digital identity solutions and IoT, whose technologies are market leaders.

## A secure and easy to deploy **integrated identity platform**

IN Groupe offers an architecture that integrates a set of already operational and proven components, based on open standards. Whether your organization needs the fully integrated omnichannel solution or an individual service, IN Groupe provides the building blocks for your identity platform. The components include:

- **Identity and Credential Management System**

Data collection, entitlement, personalization and issuance of identities and credentials, lifecycle management and self-service renewal solution.

- **Physical Identities**

Electronic identity cards, resident permit cards and passports.

- **Digital Identity System**

Onboarding, issuance and activation of mobile ID (app) and eID cards (incl. client).

- **Trust Services**

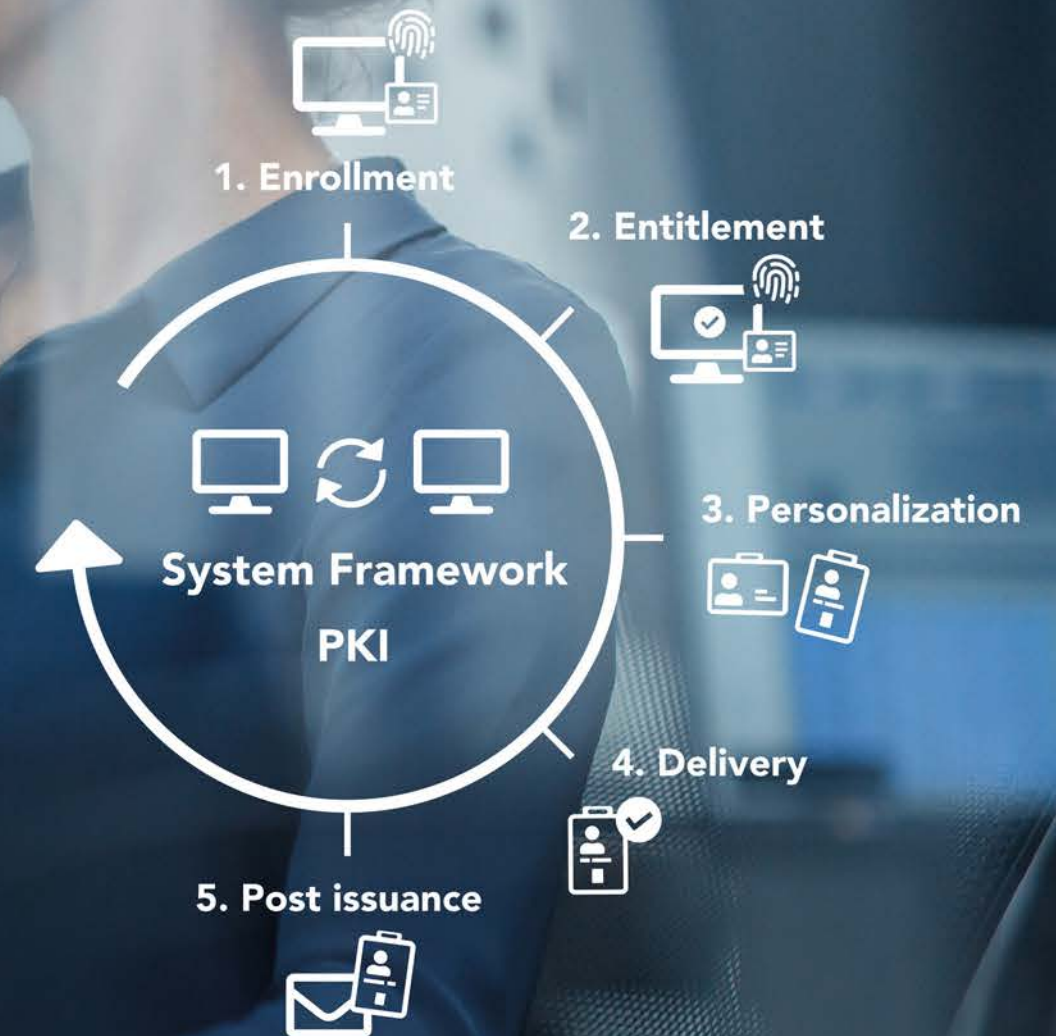

Rights and verification, authentication gateway and digital signatures services.

## Securely managing the full life cycle of your citizens' physical and digital identities

The Credentials Management System is a proven and scalable solution that allows you to manage the full lifecycle of citizen identities, during and after issuing, whether stored on a card or in a mobile phone. Benefits include:

- Solution with no vendor lock-in
- Post-issuance identity management
- OSIA and international standard conformity
- Reduce the cost of governance

## Making ID documents secure

IN Groupe provides a complete and integrated national identity solution that is in line with security, functional, and citizen use expectations. Security elements are integrated into every phase of identity document production, from graphic design to manufacturing.

## A bespoke digital platform

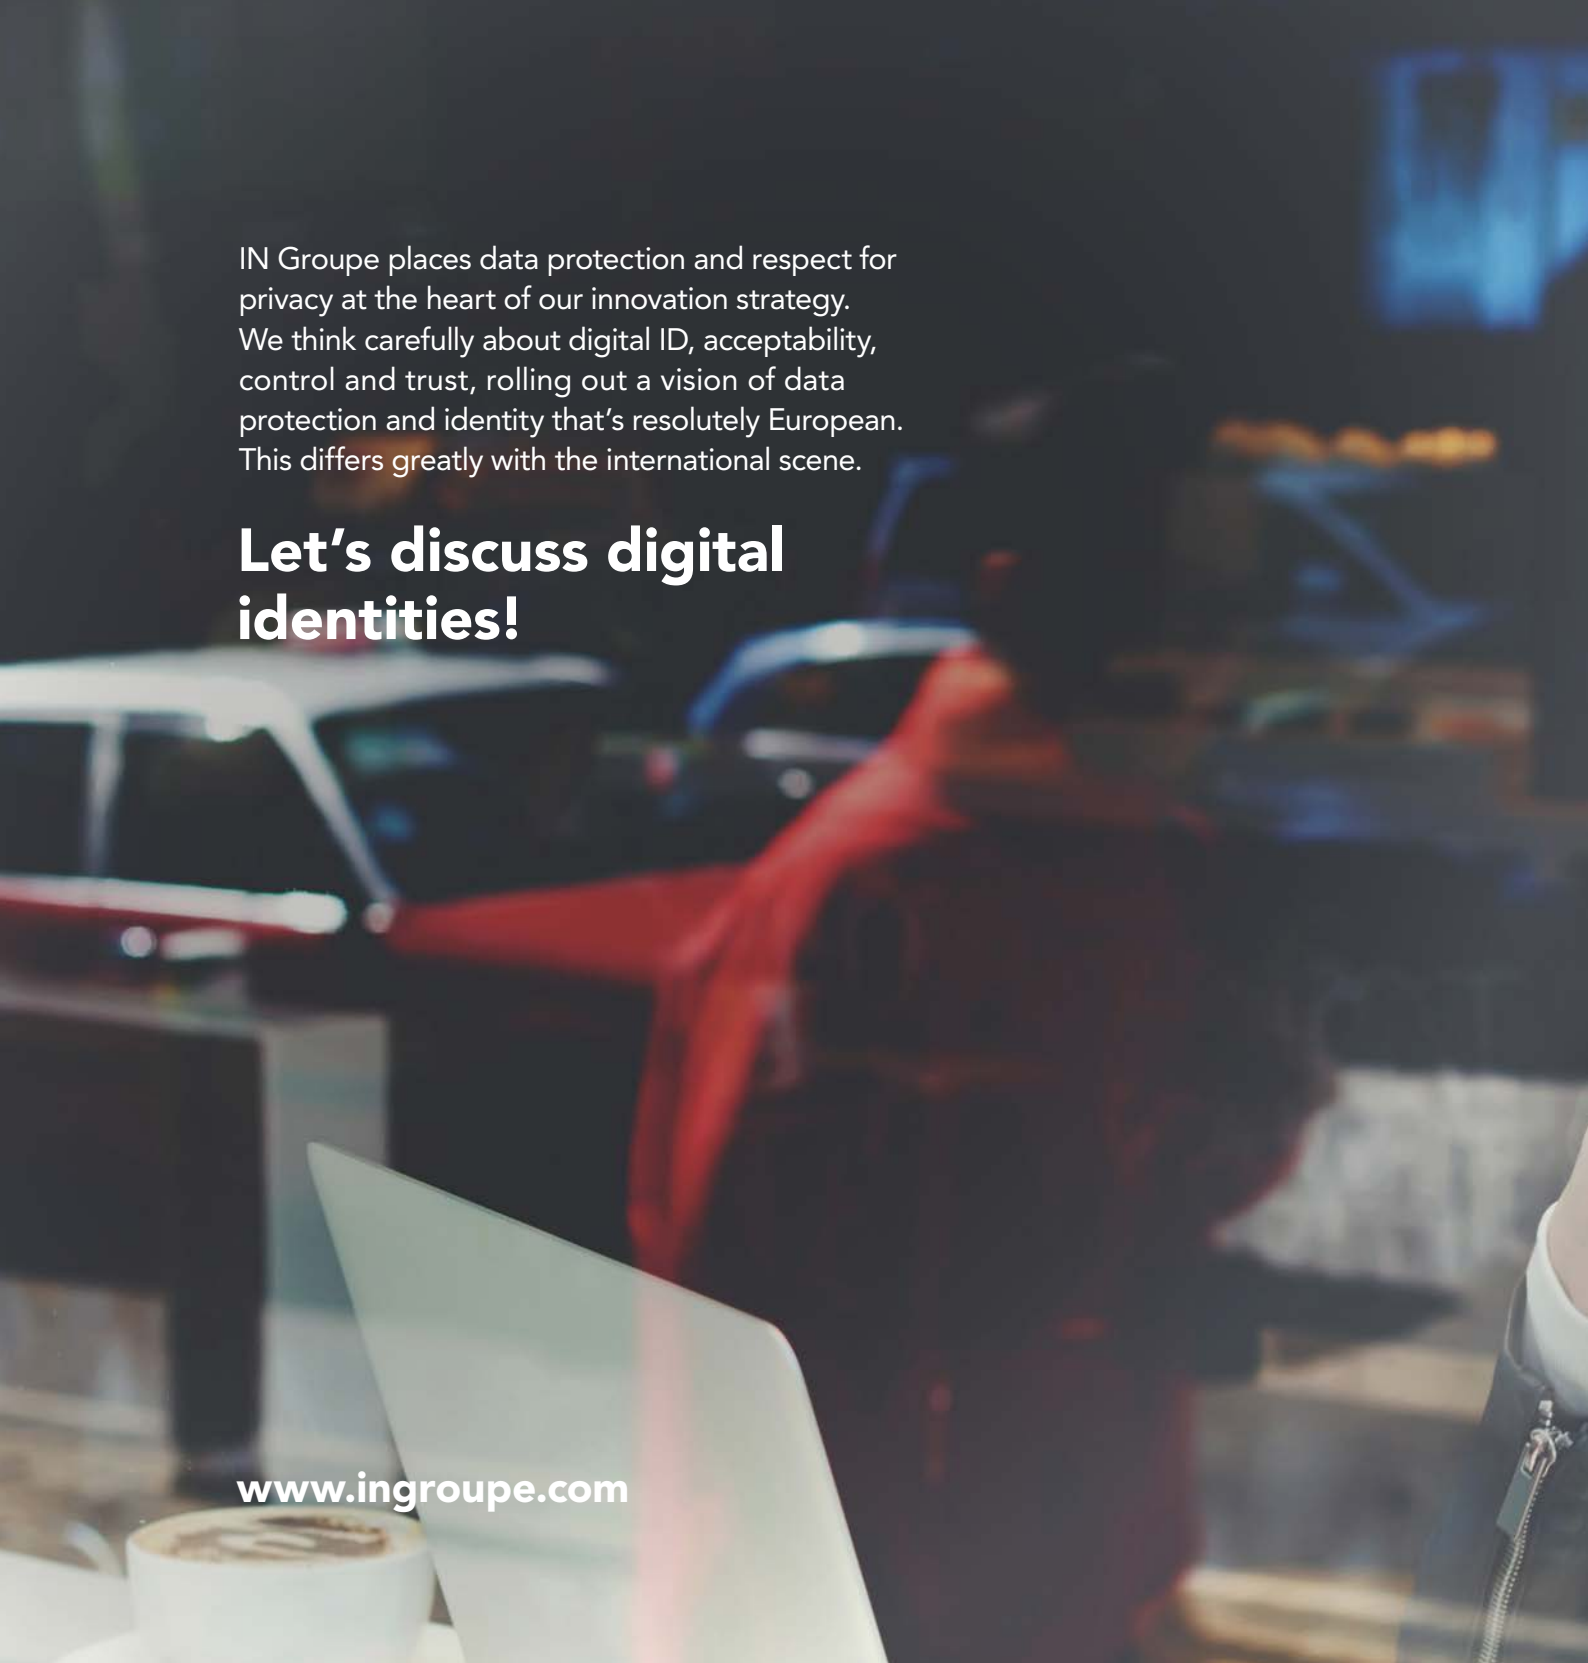

designed to make it easier and more secure to use digital tools

IN Groupe proposes a solution, which integrates with your existing ID/eID eco system in a “plug and play” way, to offer your citizens digital Identities allowing face-to-face control and secure digitalization of administrative transactions.

IN Groupe places data protection and respect for privacy at the heart of our innovation strategy. We think carefully about digital ID, acceptability, control and trust, rolling out a vision of data protection and identity that's resolutely European. This differs greatly with the international scene.
